The Perfect Brow Solution MICROBLADING

Microblading is a semi-permanent solution for perfectly defined eyebrows using a face tattooing technique. The pigment is implanted under the skin using a manual handheld tool instead of a machine in the form of hair-like strokes, creating a beautiful set of face-framing eyebrows. It's a worthy investment as no other technique can reproduce the natural look of microblading, and results with touch-ups can last up to three years with good care.
